Work at Height Regulations 2005

Reduce Risk

Did you know? You are responsible for the safety of your window cleaners.

Recently the new Work at Height Regulations 2005 were published.

The new regulations increase the duties of all building owners and those that contract others to provide window cleaning services.

The regulations require duty holders to ensure:

- the risks from work at height are assessed and appropriate work equipment is selected and used.
- those involved with work at height are competent.

Benefits of Using Water Fed Poles

- Minimise the damage caused to buildings as a result of ladder work
- Reduced disturbance to building occupants
- Reaches previously inaccessible windows and windows that are above sensitive ground areas such as lawns and flower beds
- Prevents the requirement to maintain secure fittings, such as eyebolts, and the need to hire expensive equipment
- No detergent residue means that windows do not get dirty so quickly - windows stay cleaner for longer!

...do you comply ?
